MEDIA RELEASE

Moriah College commences master planning to prepare for new innovations in learning environments

Moriah College has embarked on a master planning process with the New South Wales State Government to address the school's educational needs for the next decade.

"Rapid advances in technology, together with increased connectivity, means that our students are learning new things in new ways," said Moriah College President, Stephen Jankelowitz.

"For teaching to be relevant and meaningful, our educators need to be visionary, imaginative and adaptable with teaching and learning spaces to match. Our Queens Park campus requires an upgrade that aligns with our effective teaching methods and provides the modern, flexible and technology-rich spaces to prepare today's students for tomorrow's world."

A State Significant Development Application (SSDA) will be lodged with the Department of Planning, Industry and Environment in the coming months.

The master plan includes the creation of new Science, Technology, Engineering, Arts and Mathematics (STEAM) facilities and an Independent Learning Centre (ILC) for high school students, as well as expanded open, green spaces to allow for greater social interaction and enhanced collaborative knowledge sharing. The master plan also includes potential upgrades to the Early Learning Centre (ELC) based on an increased demand for places.

Currently, Moriah College can accommodate up to 1680 students from the ELC through to high school. The application will seek a 20% increase in numbers to satisfy demand over the coming decades. The proposed design of innovative learning environments will enable Moriah College to grow sustainably and ensure that future teaching and learning needs are met.

Another important priority of the master plan is to address the traffic circulation around Moriah College and to redirect vehicle access away from nearby residential areas on Queens Park Road.

Moriah College has engaged architectural firm fjmt to prepare the master plan and detailed designs for the initial stages of the project. Moriah College and its consultant team will begin an open, transparent and detailed consultation period with its nearby neighbours, stakeholders and community over the coming months.

-ENDS-

The above diagram indicates the proposed master plan for the southern area of Moriah College that will be the focus of works over the coming decade. Stage One includes the proposed STEAM and ILC facilities and Stage Two includes potential upgrades to the ELC, teaching staff and administration areas.

Moriah College

Moriah College is an independent, co-educational Modern Orthodox Zionist Jewish school established in 1943. The school has operated from the Queens Park campus since 1994 and accommodates students across early learning, primary school and high school.

Moriah College is committed to providing the highest standard of education for all students within a safe, inclusive and caring learning environment.

fjmt

Architecture firm fjmt is committed to design excellence and the enhancement of the public domain. The firm has extensive educational experience spanning over two decades including the new Inner Sydney High School, currently under construction for Schools Infrastructure New South Wales (SiNSW), UTS Central for the University of Technology Sydney and a number of major projects at both the University of Sydney and the University of New South Wales.
